

SEAPAC-Kingfisher Monitoring Summary and Case Resolution

During the 6-month period from 01 July 2021 through 31 December 2021, OceanMind carried out fisheries compliance monitoring using VMS data of 10 Thai-flagged fishing vessels that regularly supply to SEAPAC-Kingfisher Holdings Ltd and agreed to be monitored under this programme.

During the monitoring period, OceanMind identified and provided recommendations to support follow-up investigations into Potential Non-Compliances (PNCs).

The majority of fishing trips made by these vessels flagged no major compliance issues, and vessels showed very high levels of compliance. Most of the PNCs were due to gaps in VMS transmissions, which were investigated, and the vessels were confirmed to have remained in port and reported VMS gaps according to the relevant regulations. Therefore, all cases in monitoring reports have been settled and are considered closed.

Report No.	Period of monitoring	Status of issues	OM's approval	Date signed
OM-SP-RCN21-0033	01Jul2021 – 31Jul2021	All PNCs were closed	Yes	10-Jan-22
None	01Aug2021 – 31Aug2021	None	Yes	10-Jan-22
OM-SP-RCN21-0034	01Sep2021 – 30Sep2021	All PNCs were closed	Yes	10-Jan-22
OM-SP-RCN21-0035	01Oct2021 – 31Oct2021	All PNCs were closed	Yes	10-Jan-22
OM-SP-RCN21-0036	01Nov2021 – 30Nov2021	All PNCs were closed	Yes	10-Jan-22
None	01Oct2021 – 31Oct2021	None	Yes	10-Jan-22
