

SEAPAC-Kingfisher Monitoring Summary and Case Resolution

The SEAPAC-Kingfisher Holdings Ltd are regularly supplied by 12 Thai-flagged fishing vessels between January 2023 – February 2023 and 6 Thai-flagged fishing vessels between March 2023 – December 2023. These vessels agreed to be monitored on the Vessel Monitoring System (VMS) for fisheries compliance by OceanMind.

During the monitoring, OceanMind identified and provided recommendations to support follow-up investigations into Potential Non-Compliances (PNCs).

During the 12-month period from 01Jan2023 -31Dec2023, the majority of fishing trips made by these vessels demonstrated high levels of compliance. For this monitoring period, 10 PNC were reported. These PNCs are related to VMS gaps and VMS transmissions while the vessels operated with speeds ranging between 0 – 1.5 kts at-sea. OceanMind requested the Thai-Department of Fisheries to investigate the reason for the VMS outage. All cases related to satellite’s transmission and system problems. Therefore, all cases in the monitoring reports have been settled and are considered closed.

Report No.	Period of monitoring	Status of issues	OM's approval	Date signed
OM-SP-RCN23-0001	01Jan2023 – 31Jan2023	Closed	Yes	05-Jan-24
OM-SP-RCN23-0002	01Feb2023 - 28Feb2023	Closed	Yes	05-Jan-24
