

SEAPAC-Kingfisher Monitoring Summary and Case Resolution

The SEAPAC-Kingfisher Holdings Ltd are regularly supplied by 6 Thai-flagged fishing vessels between January 2025 – October 2025. These vessels agreed to be monitored on the Vessel Monitoring System (VMS) for fisheries compliance by OceanMind.

During the monitoring, OceanMind identified and provided recommendations to support follow-up investigations into Potential Non-Compliances (PNCs).

During the 10-month period from 01Jan2025 -31Oct2025, most fishing trips made by these vessels demonstrated high levels of compliance. For this monitoring period, only 1 PNC was reported. This PNC is related to two events of VMS gaps inside the Thai Exclusive Economic Zone (EEZ). OceanMind requested that the Thai Department of Fisheries investigate the reason for the VMS outage. The investigation revealed that the vessel had obtained permission from the Thai DOF to turn off its VMS until 04Jun2025.

With this, the single case in this monitoring report had been settled and is considered closed.

Report No.	Period of monitoring	Status of issues	OM's approval	Date signed
OM-SP-RCN25-0001	01Jun2025 – 30Jun2025	Closed	Yes	15-Jan-26
